Description

This 2025 Volkswagen ID.5 Pro Match is an electric vehicle that has been maintained with a full dealership service history. Having had only one owner from new, this example has covered a low mileage of 8,000 miles and benefits from being Volkswagen manufacturer approved. The ID.5 offers a practical driving experience, featuring a large boot space and an impressive maximum range of 344 miles on a full charge. When using a public rapid charger, the battery can be charged from empty to 80 percent in 32 minutes, while a home 7kW charger completes a full charge in 11 hours and 55 minutes. Performance is responsive, with the vehicle capable of accelerating from 0 to 60mph in 6.3 seconds. Comfort and convenience are prioritised through a range of equipment, including a heated leatherette-wrapped multi-function steering wheel with touch control, 2-zone air conditioning, and keyless entry and start. Safety and visibility are supported by adaptive cruise control and matrix LED headlights that include automatic control and poor weather lighting.
