Description

The 2026 SEAT Ibiza TSI SE Technology is a modern hatchback that combines practicality with efficient performance. This particular vehicle is powered by a 1.0 litre petrol engine and meets Euro 6 emission standards, ensuring it remains compliant with current environmental regulations. With only 2,000 miles on the clock, this car offers a low mileage option for those seeking a vehicle that has seen very little use since it was first registered. This model is designed to be an economical choice for daily driving, achieving an impressive fuel economy of 55 mpg. Beyond its efficiency, the car is equipped with practical features such as air conditioning, which includes a dust and pollen filter to maintain a comfortable cabin environment. Connectivity is straightforward thanks to the integrated Bluetooth audio streaming and handsfree system. Furthermore, the vehicle provides a large boot space, making it a versatile option for carrying luggage or shopping compared to other cars in its class, all while maintaining low CO2 emissions.
